Letter No: 2081/082

Date: 26 January 2025

Ref No: 1738

TO WHOM IT MAY CONCERN

This is to certify that **Ms. Anjali Bista** has completed her internship, at Siddharthanagar Municipality, Rupandehi, Lumbini Province, Nepal as an intern in IT Department of Siddharthanagar Municipality under the supervision of **Mr. Tapan Pandey**. Her 9-week internship commenced on **24 November 2024** and concluded on **24 January 2025**.

During her internship, she has demonstrated good skills with a self-motivated attitude to learn new things. Her performance has exceeded expectations and she was able to remain on path to complete the planned project successfully and on time.

We wish her all the best for her future endeavors.

Letter of Recommendation

I am honored to write this letter of recommendation for Ms. Anjali Bista. I have thoroughly looked over her work with us during her internship period. Her work with us has satisfied the particulars mentioned in this report. Ms. Anjali Bista is a great team member and has the competency and basic experience needed in the journey to become an IT officer in future.

As her internship work at the Department of Information Technology, Siddharthanagar Municipality was done in partial fulfillment of the requirements for the degree of Bachelor of computer Application. I hereby recommend this internship report done under my mentorship for the final evaluation.

.....

Acknowledgement

Foremost, I would like to express my sincere thanks of gratitude to my internship supervisor, **Mr. Suraj Pandey** for his continuous support and help in the internship work. I cannot thank him enough for all his patience, motivation, and immense knowledge. His guidance helped me all the time with the project.

Secondly, I want to thank **Mr. Tapan Pandey**, my mentor. Without his support and dedication, I couldn't have imagined completing this project.

I would like to express my gratitude to Tribhuvan University for providing me a great opportunity of collecting. Lastly, I want to thank my parents and friends and all known unknown individuals who helped me in various way during my internship period. With this internship, got a chance to collect real world work experience. I am thankful to them for all their support, helps guidance, motivation, and corrections.

I have tried to mention and give credit to everyone who helped me in this project, along with the sources from where I collected the required data and information which supported this project. Yet, there may be some unintended errors and some sources or individuals may have been missed to mention. I shall feel obligated if they are brought to my notice.

ABSTRACT

This project has been submitted in the fulfillment of the requirements for the Bachelor of Computer Application. The team members of this project, take pleasure in presenting the detail internship report that reflects our efforts in this semester.

This internship report serves the purpose to record the details of my internship which was done at the Department of Information Technology, Siddharthanagar Municipality. The Department of IT is the department at Siddharthanagar Municipality that look over entire IT infrastructure and other departments of the municipality.

Students who are undertaking the Computer Application degree in Tribhuvan University are compulsory to undergo an industrial training at one of the recognized organization or company for a period of three months prior to graduating. Students are allowed to make their own choices to enter any organization to do their internship, as long as the organization have IT infrastructure to work on. The objectives of doing this internship are to give exposure to the students to the real working life, enable the students to develop a deeper understanding on the course which they are undertaking and to provide the appropriate work-related trainings to them in the field of Software Development and Computer Application Profession.

DONIDCR: Department of National ID and Civil Registration

Chapter-1: Introduction

1.1 Introduction

During my internship, I successfully completed the "Online Civil Registration" project, focusing on streamlining the registration process for vital events such as birth, death, marriage, divorce, and migration in Nepal. This project was undertaken in collaboration with the Department of National ID and Civil Registration (DONIDCR), the official body managing civil registration systems in the country.

Department of National ID and Civil Registration (DONIDCR) is a system that has been assigned to manage and regulate vital event registration system. This system handles the responsibility of multipurpose registration of vital events in an individual's life, such as birth, death, marriage, divorce, and migration of individuals under social security. Civil registration ensures an accurate database of individuals, crucial for delivering essential services and strengthening governance in Nepal.

The Online Civil Registration system integrates modern technology to digitize the process of recording vital events. This unified platform securely stores citizens' information, simplifying administrative tasks and providing easy access to state-provided facilities and benefits.

By enabling online registration, the system minimizes physical visits to government offices and reduces delays. It also enhances data accuracy, creating an updated and interconnected database to support efficient public service delivery.

1.2 Problem Statement

- **Geographical and Infrastructure Barriers:** Remote and rural areas in Nepal face significant difficulties in accessing civil registration services due to a lack of infrastructure, transportation challenges, and limited outreach programs.
- **Low Public Awareness and Engagement:** Many citizens are unaware of the importance of civil registration and its legal obligations, resulting in under-registration of vital events such as births, deaths, and marriages.

- **Administrative Inefficiency:** The lack of coordination among various administrative departments and limited training of personnel further exacerbate inefficiencies in service delivery and data management.
- **Limited Technological Adoption:** The absence of digital tools and integration with public services hinders the effective management and accessibility of vital records, restricting the ability to provide timely and efficient services to citizens.

1.3 Objectives

- To enhance the accuracy and reliability of vital records by minimizing errors through automation.
- To integrate the system with other governmental databases for streamlined identity verification and service delivery.
- To reduce administrative burdens and improve efficiency by automating manual tasks.
- To increase public awareness about the importance of civil registration and encourage timely registration and to provide accurate data for evidence-based policy-making and development planning in Nepal.
- To safeguard sensitive citizen information by implementing robust security and privacy measures.

1.4 Scope and Limitation

Scope

- This system ensures accurate and centralized management of vital records, enabling easy access and efficient retrieval for both citizens and government authorities.
- It integrates with other governmental services, streamlining identity verification and enhancing service delivery across multiple sectors.
- By automating the registration process, the system reduces administrative burdens, minimizes errors, and improves overall efficiency in civil registration.

Limitation

- Reliable internet access is essential for using the system, which poses challenges in remote and underserved areas of Nepal.

1.5 Report Organization

This report contains 5 chapters which are described below:

Chapter 1 deals about introduction of the system. It answers “what the system is?”, “what this system does?”. It also states problem of statement what existing problem lags. Objective of the project, scope and limitation in details

Chapter 2 describe the details of the organization and its hierarchy. It include working domains of the organization and tells about the intern department or unit.

Chapter 3 is all about literature review and background study.

Chapter 4 is about what roles and responsibilities participants played and their weekly log. It deals about the description of project which is involved during internship and the tasks or activities performed while doing this project.

Chapter 5 describes about conclusion and Learning Outcomes.

Chapter-2: Introduction to Organization

2.1 Organizations Details

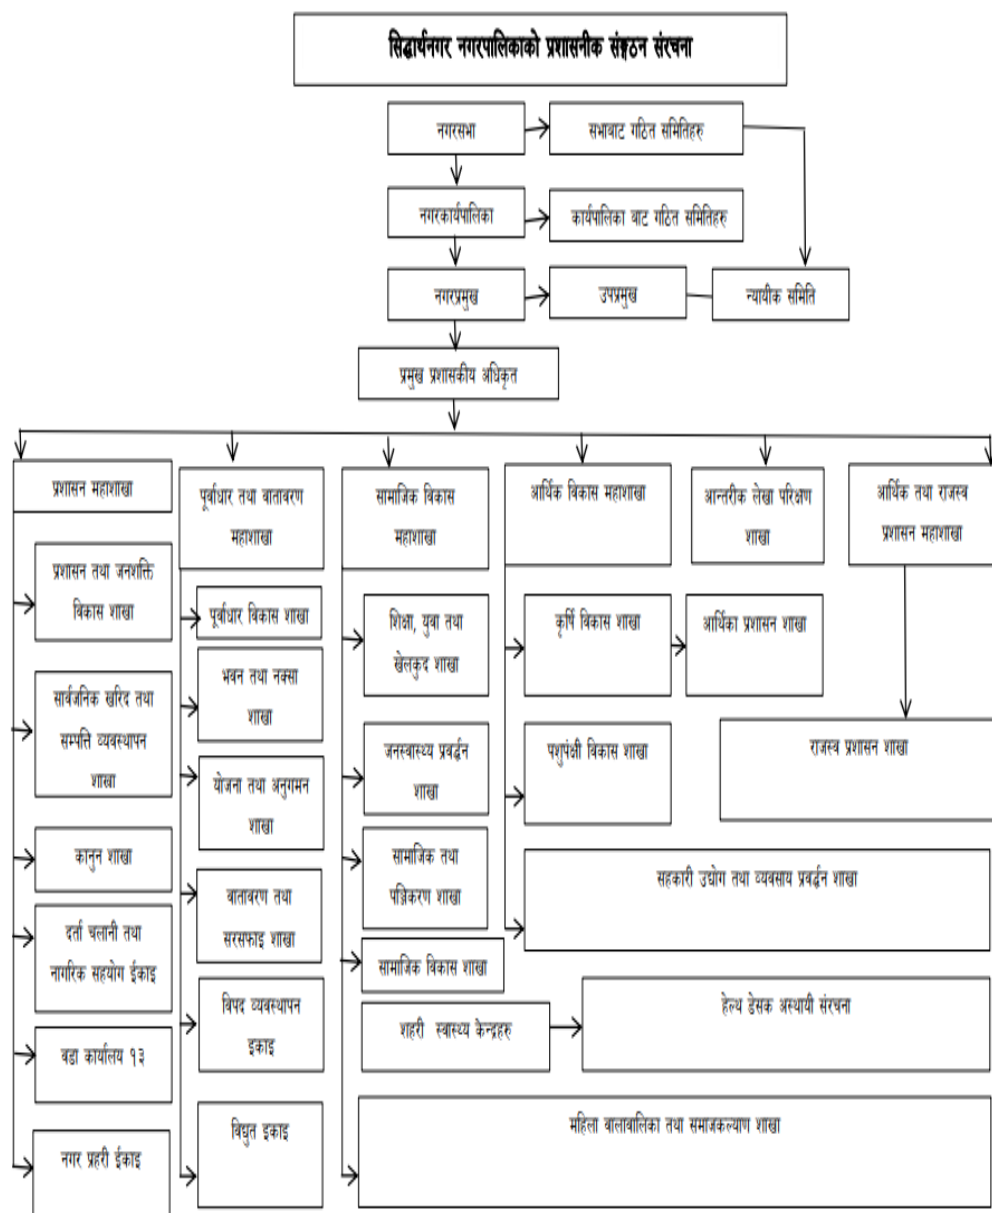

Siddharthanagar Municipality lies on the southern part of Rupandehi District of Lumbini Province which is also an administrative headquarter of Rupandehi District. The municipality is named after Siddhartha, the childhood name of Lord Gautam Buddha. In 2024 BS, This city was formally declared as municipality under the name of Bhairahawa Nagar Panchayat. The name of the municipality has been changed from Bhairahawa to Siddharthanagar since 2033 B.S. Divided into 13 wards, the municipality is bounded on the east by Omsatiya and Rohini Rural Municipality, on the west by Mayadevi Rural Municipality, on the north by Omsatiya and Mayadevi Rural Municipality and on the south by Sunauli (Maharajgunj District, India).

In local level, there has a mayor and a deputy mayor which are elected from the people. Then after, chief administrative officer which works as a Head Administrator. Under that, it consists of 5 major departments. Information Technology is a small unit of social development sector where all the IT related works are carried out. All the IT related work and programs of municipal and ward level are handled by the Department of IT. It also handles online system of national and local level. The IT department oversees the installation and maintenance of computer software as well as troubleshoots different types of software and hardware related problems. It ensures the best use of systems at local level, provincial level and national level. It coordinates with different unit/department of municipality to carry out the best outcomes.

Siddharthanagar Municipality is basically supervision, guarding, and securing the cleanliness of public places, hotels, restaurants, dining rooms, tea rooms, baths, cinemas, etc., which are used by the public. Also guarding the sanitation of food and drink which are used by public and maintenance of water well and springs according to health regulations. Helping governmental personnel in enforcement of their program of the prevention of communicable diseases of humans and animals. Examination of the health and technical ability of workers, servants and occupations such as banker, servant, nurse, cleaners, drivers, buggy riders, porters, milk sellers and all other food sellers and other occupations. Municipalities give permission to work only to those persons who have certificates of health and technical ability.

2.2 Organization Hierarchy

सिद्धार्थनगर नगरपालिकाको सङ्गठन तथा व्यवस्थापन संरचना

(१०)

2.3 Working Domain of Organizations

In local level, there has a mayor and a deputy mayor which are elected from the people. Then after, chief administrative officer which works as a Head Administrator. Under that, it consists of 5 major departments. Information Technology is a small unit of social development sector where all the IT related works are carried out.

2.4 Description of Intern Department/Unit

All the IT related work and programs of municipal and ward level are handled by the Department of IT. It also handles online system of national and local level. The IT department oversees the installation and maintenance of computer software as well as troubleshoots different types of software and hardware related problems. It ensures the best use of systems at local level, provincial level and national level. It coordinates with different unit/department of municipality to carry out the best outcomes.

Chapter-3: Background Study and Literature Review

3.1 Background Study

Civil registration in Nepal has a long history, deeply rooted in the administrative evolution of the country. The formalization of civil registration processes began in the 1970s with the enactment of the Civil Registration Act (1977), which established a framework for recording vital events such as births, deaths, marriages, and divorces. Initial implementation efforts were rudimentary and primarily paper-based, focusing on urban areas while rural regions remained underserved. Over the decades, pilot projects such as the Vital Registration and Statistics initiative in the 1990s and subsequent programs under the e-Governance Master Plan (2015) sought to modernize the system. These efforts aim to ensure every citizen's legal identity, promote equitable access to public services, and improve national data systems. For Nepal, robust civil registration is not merely an administrative requirement but a cornerstone for inclusive development, governance, and social justice.

Governments in developing countries, including Nepal, face significant challenges in maintaining accurate and up-to-date civil registration systems. The reliance on separate, non-digitized databases for various programs often leads to redundancy, inefficiencies, and data fragmentation. These issues hinder the effective delivery of public services such as health care, education, and social welfare. Additionally, the lack of integrated databases makes it difficult to cross-reference information, resulting in governance gaps and limited policy effectiveness. Civil registration is essential for addressing these challenges by providing a unified, reliable source of demographic data that can support efficient public administration and drive national development.

Technological advancements have played a transformative role in the evolution of civil registration systems in Nepal. From the initial digitization of records in the early 2000s to the development of online registration platforms, these innovations have significantly improved the accuracy and accessibility of civil registration services. Modern systems now track individuals throughout their lives, linking vital events such as birth, marriage, and death records. For example, digital registration platforms integrate with related documents like citizenship certificates and passports, streamlining administrative processes. Furthermore, as global expectations rise, developing countries like Nepal are

under increasing pressure to provide services comparable to those in wealthier nations, such as real-time registration and secure digital identity management.

The evolution of civil registration systems has been marked by the growing adoption of electronic and biometric technologies. These innovations have revolutionized identification processes by providing secure and reliable methods for verifying individual identities. The biometrics industry has experienced rapid growth, particularly in developing regions, as governments recognize the potential of technologies like fingerprint and iris scanning for ensuring accurate and tamper-proof records. As of 2025, Nepal has begun incorporating biometric components into its civil registration system, aligning with global trends and enhancing the accuracy and efficiency of identity management. Such advancements not only improve service delivery but also strengthen national security and governance frameworks.

The integration of biometric and electronic technologies into online civil registration systems offers numerous benefits. These include enhanced administrative efficiency, reduced operational costs, and fewer human errors compared to manual, paper-based systems. Advanced systems also support e-government initiatives by facilitating seamless access to public services and enabling data-driven policymaking. For instance, electronic records simplify processes like voter registration, social benefit distribution, and disaster response. In contrast, traditional manual systems are prone to inefficiencies, delays, and inaccuracies, which can impede governance and development efforts. By adopting modern identity management systems, Nepal can unlock significant socio-economic benefits and accelerate its journey toward digital transformation.

3.2 Literature Review

The development of an online civil registration system in Nepal has been a gradual process, shaped by advancements in technology and government initiatives aimed at improving governance and service delivery. According to the e-Governance Master Plan (2015), the Digital Birth Registration program was introduced to enhance the efficiency and accuracy of civil registration systems. This initiative reflects broader global trends, as noted by Bennett and Lyon (2008), where governments leverage technological innovations to create systems capable of tracking vital events throughout an individual's life. Pilot projects integrating digital technologies, as highlighted by Clarke (2010), have demonstrated the potential for scalable solutions that link civil registration records with other vital systems, such as national IDs and citizenship documents. Furthermore, the adoption of biometric technologies, as emphasized by Khan (2012), is pivotal in ensuring the security and reliability of e-government services. By transitioning from traditional paper-based registers to advanced electronic systems, Nepal has taken steps to reduce administrative costs, minimize errors, and enhance service accessibility, aligning its civil registration framework with international best practices.

3.3 Overview of the System

This system is a comprehensive solution designed to streamline and digitize the management of vital events in Nepal, including **birth registration, death registration, marriage registration, migration tracking, and divorce registration**. The primary goal is to enhance the efficiency, accuracy, and accessibility of civil registration processes while ensuring compliance with national policies and international standards.

- **Birth Registration:**

To register a birth in Nepal, you can:

- Visit the local ward office within 35 days of the birth
- Apply online through the website <https://donidcr.gov.np/>

Required documents for this registration are listed below:

- A copy of the father or mother's citizenship card and marriage certificate.
- Evidence of the last vaccination
- A document issued by the concerned Ward certifying the birth

- **Death Registration:**

In Nepal, a death must be registered within 35 days at the local Ward Office or municipality where the death occurred. The head of the family or a major family member is responsible for reporting the death.

To register a death, you'll need to bring the following:

- A token number generated by filling out an online form <https://donidcr.gov.np/>
- The deceased's citizenship or a death certificate issued by the hospital
- A copy of the indicator's citizenship certificate
- A copy of the property tax payment certificate

- **Marriage Registration:**

To register a marriage, you'll need to bring the following:

- Go to your concerned ward office. (Both husband and wife)
- Fill up an online form through the website <https://donidcr.gov.np/> and note down the token number provided. (This facility may be provided by the ward itself or you may need to go to cyber).
- Citizenship of both husband and wife.
- 2/2 pp size photos each of both husband and wife.

- **Divorce Registration:**

To register a divorce, you'll need to bring the following:

- An official copy of the registered marriage certificate is necessary to prove the marital relationship.
- Copies of the citizenship certificates of both spouses.
- Government-issued ID cards (e.g., Voter ID or Passport) for verification.
- A formal divorce petition/application filed with the relevant District Court. The format and content should comply with Nepalese legal requirements.

- Evidence of the current address of both spouses (e.g., utility bills, tenancy agreements, or citizenship certificate with an address).
- Recent passport-sized photographs of both parties.

- **Migration Registration:**

To register a migration, you'll need to bring the following:

- A migration application form obtained from the respective Ward Office or Municipality Office.
- A copy of the applicant's citizenship certificate.
- A recommendation or clearance letter from the Ward Office of the current place of residence.
- Documents showing the address in the new location, such as:
 - Utility bills.
 - Tenancy agreements.
 - Landownership certificate (if applicable).
- For migrating with family, a family relation certificate may be required.
- If the migration is due to marriage, a marriage certificate is often necessary.
- Recent passport-sized photographs of the applicant.

Chapter-4: Internship Activities

4.1 Roles and Responsibilities

My major responsibility in this project was to fill in the details given in the information form correctly, submit the original and copies of the required documents, and check the details correctly.

4.2 Description of project involved during internship

“Online Civil Registration” is the work done by me during my internship period. It is done with the help of Department of National ID and Civil Registration (DONIDCR) system. It provides a multipurpose biometric smart card with national identity to Nepali citizens. It formulates the necessary infrastructure, policies, and laws to issue national ID cards. It allocates the services provided by the Government of Nepal to the Nepalese citizens in the national identity card system and to use the data and records obtained from that system in policy and planning.

4.3 Tasks/Activities Performed

- Working on Ms excels.
- Working on Ms Word.
- Troubleshooting the hardware and software problems.
- Printing and scanning the documents.
- Gathering information about the required documents for the registration.
- Verifying the documents of citizen.
- Filling the details of the citizen in the system after its verification.

4.4 Weekly log

Weekly log summarize work activities for the week. It includes daily activities. Explain how intern made the most of their internship: skills learned & used, responsibilities given, accomplishments, achievements. Include observations about the workplace environment that may influence career choice. Continue on the back if necessary. The weekly logs during internship period are as follows

Weekly Internship Log

Name: Anjali Bista

Project: Online Civil Registration

Week No: 1

Date: 24 Nov, 2024

Responsibilities:

- Get familiar with the organization and its working.
- Understanding the local level and hierarchy of municipality.

Activities:

- Communication with the intern department of the organization.
- Understanding the hierarchy and chain of command of the organization.

Observations:

- The organization was complex body with distinct departments.

2Plan for Next Week:

- Understanding the law and policies of municipality.

Performance Appraisal by Mentor:

Mentor's Approval:

Name: Tapan Pandey

Signature:

Weekly Internship Log

Name: Anjali Bista

Project: Online Civil Registration

Week No: 2

Date: 01 Dec, 2024

Responsibilities:

- Get familiar about the laws and policies of municipality.

Activities:

- Communication with the different section of the member.
- Communication with the executive body to understand the laws and policies of municipality.

Observations:

- The organization has followed good business ethics and has it well documented.

Plan for Next Week:

- Understand software used in IT department of municipality.
- Get familiar with the official website of the municipality.

Performance Appraisal by Mentor:

Mentor's Approval:

Name: Tapan Pandey

Chapter-5: Conclusion and Learning Outcomes

5.1 Conclusion

On the whole, this internship was a valuable experience. I gained new knowledge, practical skills, and had the opportunity to collaborate with professionals in the field. I successfully met several of my learning goals, though some were limited by specific circumstances.

Through this project, I gained deeper insights into the professional practices involved in digital governance. I learned about the various aspects of implementing and managing an online civil registration system and how it contributes to improving administrative efficiency and service delivery. Related to my studies, I explored emerging technologies and their applications in streamlining data management and enhancing accessibility. While there is still much to learn and refine in this area, the internship allowed me to recognize my strengths and identify areas where I need further improvement.

I am particularly pleased that my technical knowledge and problem-solving skills were sufficient to make meaningful contributions to the project. This experience has not only deepened my understanding of digital solutions for civil registration but has also motivated me to continue developing my skills in information technology.

In conclusion, this internship has provided me with valuable professional insights and reaffirmed my aspiration to build a career in IT, particularly in developing systems that enhance public services.

5.2 Learning Outcomes

After completing this internship, I have evaluated that I have learned the following important lessons:

- Understanding the organizational environment, policies, and procedures related to digital governance.
- Gaining insights into the hierarchy and workflow of administrative bodies involved in civil registration at the local and national levels.
- Developing the ability to operate and manage the online civil registration system effectively.
- Acquiring skills to troubleshoot technical issues related to the system, including hardware and software challenges.
- Learning to handle document digitization tasks such as scanning and maintaining digital records accurately.
- Enhancing my understanding of lifelong learning processes through critical reflection on technical and professional experiences.
